

**iX CAM**

© imos

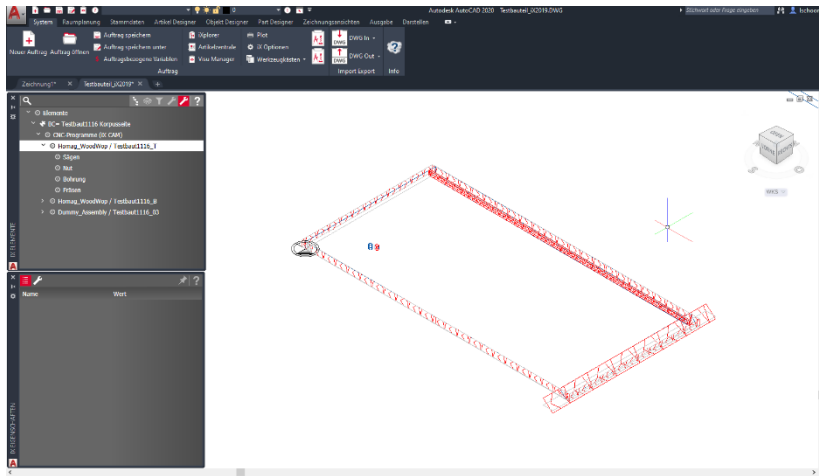

**Multi-Workflow ✓**

- Assignment of a part to all matching workflows for data generation for flexible production planning
- Creation of several alternative programs from different workflows

**Optimization of process times ★**

- Individual definition of the processing time per process step
- Calculation and provision of process times

## iX CAM Edit

- Additional module for iX CAM
- Modification of individual NC programs without changing the design in iX CAD
- Individual correction of the processing programs created with iX CAM without changing the main data
- Animation of the CAM data on the component to control the machining processes
